

Continuation Therapy/ Part 1

Stratum III: Continuation Therapy

Part 1

* For dose modification, refer to Section 10.7

Part 1 starts at day 21 from the start of the 2nd, 3rd, or 4th course of 2-CdA/Ara-C in patients with response AD Better (please beware the **different dose and duration** compared to the 2CdA/Ara-C courses). The second course is started on day 21 after the start of the first one, provided the blood counts have recovered to ANC >0.75 x10⁹/L and platelets > 75 x10⁹/L. Each course consists of:

- **2-chlorodeoxyadenosine** (2-CdA, Cladribin®, Leustatin®)
5 mg/m²/day as a 2 hour i.v. infusion given daily for 3 days
